MySQL · PostgreSQL · Redis /
Horizon

Frontend

React · TypeScript · Inertia ·
Vue 3 · Tailwind

Mobile & Desktop

React Native · Expo (native +
web) · Electron

Data & AI

RAG & embeddings · pgvector ·
Elasticsearch

DevOps

Senior full-stack architect with **15+ years** building and leading scalable web applications. I specialise in **integration-heavy, multi-tenant SaaS**, wiring products to the payment, payroll, accounting, messaging and AI systems they depend on. I deliver it as an independent contractor: **remote, async, and accountable for outcomes**, not hours.

HOW I ENGAGE

Remote-first & async

I work across your day and deliver on outcomes, with no dependence on office hours or a desk.

Ticket-driven delivery

Board, PR, staging, production. You always see exactly what's in flight.

Own it end-to-end

Backend, frontend and mobile: a senior who takes responsibility for the whole feature, not a slice.

A service, not a seat

Engaged as an independent contractor: you get judgement, architecture and ownership, with none of the employment overhead.

EXPERIENCE

● Bakeronline Senior Full-Stack Developer & Technical Lead

2022 – present

Technical lead on a large-scale e-commerce ordering platform serving thousands of daily users. Led the migration of a 10+ year legacy PHP 7.4 codebase to a modern Laravel architecture (DDD, TDD) with zero downtime, introduced GitHub Actions CI/CD, and manage a cross-functional team through code review and mentoring.

DDD / TDD

CI/CD

Payments

Team lead

○ Skedle Freelance, full-stack & integrations

Nov 2025 – present

Multi-tenant workforce-planning & payroll SaaS on a Symfony back-end. Migrated the admin from legacy Twig templates to a React SPA built on Inertia principles, and maintained & upgraded the Belgian payroll integrations (Dimona, RSZ, flexi-jobs, EasyPay, Exact Online) and the contract & billing engine. Also universal React Native / Expo apps for employees and employers.

EDUCATION & GROWTH

Web Development

PTI Ninove · 2014–2017

Continuous upskilling

Laravel · React · TypeScript · AI · Devworld Conf

Independent freelance clients

Senior Full-Stack Developer, self-employed

2017 – present

Custom SaaS, e-commerce and integration work delivered alongside full-time roles. Recent engagements include **autoi.be** (Laravel + React/Inertia e-commerce with Mollie payments and two-way CloudPos register sync), an **AI-assisted vertical SaaS** as co-founder & lead engineer (RAG over pgvector, WhatsApp/Twilio, launching late 2026), and a **fintech integration connector** piping Airwallex expenses into Exact Online.

Webhooks

Clarabridge (Engagor) Full-Stack Developer

2019 – 2022

Social-media engagement platform: a unified inbox for customer support across every channel. Built features and API integrations with Facebook, Instagram, X/Twitter and LinkedIn, backed by MySQL and Elasticsearch, and led code reviews for the team.

PHP

Social APIs

Elasticsearch

Proximus Process Specialist / Full-Stack Lead

2011 – 2019

Owned the inbound-contact platform handling ~100,000 interactions per day: unified the IVR flows into a single number, built the visual web-contact platform (proximus.be/contact) as a React SPA on a Laravel API, and the reporting dashboards behind it, cutting routing errors and automating ~50% of inbound.

Enterprise scale

SELECTED PROJECTS

autoi.be

E-commerce + custom CMS, Laravel & React/Inertia. Mollie payments, CloudPos sync, Horizon-queued mail, Firebase push, PHP websockets.

anpassant.be

SPA (React/TS) on a Laravel API with a custom CMS and third-party integrations (Qualityguard, Vendon machines).

Billing suite

An online invoicing web app and a native **Electron** desktop version (React + Firebase) for offline invoice creation.

Proximus contact platform

Unified IVR, visual web contact, and reporting over ~100k daily interactions. Enterprise-scale full-stack.
